

COMMITTEE LOCATED

Are Now Permanently in Chicago.

BRYAN AND THE DEMOCRATS.

Will Have Their Solid Support in the East.

CHICAGO, Aug. 21.—Chairman Jones, of the national Democratic campaign committee, has changed its mind as to the location of their headquarters. The Democratic national campaign will be conducted from the auditorium annex. Jones said that there was too much noise from the street traffic in the rooms selected at the Sherman house. The battle between the two great parties will therefore be directed from the same location, practically conducted under the same roof. Jones has appointed Clark Howell, of Georgia, as chief of the literary bureau, U. (Grizzly) Adams as his chief assistant, and Daniel McConville, of Ohio, as chairman of the speaker's bureau.

Bryan and the Democrats.

UPPER RED ROCK, N. Y., Aug. 21.—Candidate Bryan has worked all morning on his letter of acceptance to the mill. He will spend the afternoon at a nearby fishing resort. After reading the newspaper account of alleged support of the ticket by the New York Democrats, he said he did not believe the situation had been exaggerated and he always believed that the New York Democrats would be true to party nominees. He was gratified to find so many eastern Democrats falling into line and added that before the campaign closed he expected the co-operation of all the Democrats except those whose pecuniary interest might be advanced by the gold standard. It is said that Dr. Jenkins, of New York, gave Bryan the intimation that Croker would be with him.

Two Barns Burned Eugene—Work of Firemen.

THE FIGHT DECLARED OFF

One of Oregon's Pioneers Dead—Other News.

Fire at Eugene.

EUGENE, Or., Aug. 20.—There was a brief but fierce conflagration at midnight, last night, and in a short time two barns were in ashes. The flames were first discovered in a barn on Olive street, the rented property of M. S. Hubble, the drayman. The city fire department responded quickly, but the flames soon leaped across the alley onto William Renshaw's barn. Both buildings were frame, and burned rapidly. All the department could do was to prevent the spread of the fire to adjoining buildings. Mr. Hubble, who is at Newport with his family, lost 10 tons of hay, considerable grain and other stuff. Two lots of household goods, stored in the barn by other parties, and a fine \$300 spring furniture wagon, belonging to Day & Henderson, were destroyed. Renshaw saved his horse, buggy and cart, but lost everything else. His loss will not exceed \$150. There was no insurance on either of the buildings or their contents.

Killed in a Mill.

FOREST GROVE, Or., Aug. 21.—Chas. Solren, an employe of Carsten's mill, four miles north of Greenville, was instantly killed while at work in the mill about noon yesterday, by having his head crushed between two logs, while loading logs on a tram car. About one year ago the unfortunate young man was severely injured while at work in the same mill, and it was thought for some time he would not recover from internal injuries, but escaped with only a broken arm and leg. About two years ago, Solren was also nearly killed in a runaway accident. Deceased was about 23 years of age and unmarried. His mother resides in Arroyo Grande, Cal.

Broke Through a Bridge.

STOCKTON, Cal., Aug. 21.—At dusk last evening a band of 125 cattle was being driven across the county bridge over the Merced river, about twelve miles south of Turlock, the bridge gave way and the greater number of the animals were dropped into the stream, falling a distance of about 100 feet. About a score of the cattle had their legs broken, and others were otherwise injured. A large number of them will have to be killed. A number are also thought to have been drowned. A section of the bridge was left standing in the middle, and a dozen or so of the animals were left there. It is impossible to rescue them from their lofty perch.

Children Derail a Train.

CANTON, O., Aug. 21.—A thorough investigation was made into the derailing of engine 49, which was hauling a work train last night, near Carrollton, the locomotive rolling down an embankment and killing Engineer Joseph Kirk and Fireman John Hardisty, of this city. The investigation shows the accident to have been caused by children having placed three spikes on the outside rail of the curve, where the derailment occurred. It is not to be taken lightly for a length of time, what is known as iodism results. Different individuals are affected differently by this drug. There are three forms of iodism: first, that in which the symptoms are those of gastric irritation; second, that characterized by nervous troubles, neuralgia, ringing in the ears, convulsive movements, disturbed intellect; third, that characterized by rapid emaciation, commencing mostly in the face, and severe nervous palpitations of the heart, with excessive appetite, which sometimes precedes and sometimes follows the loss of flesh. These symptoms are said to be most easily induced in gaitous persons.—Brooklyn Enquirer.

MARKETS ARE UNEASY.

Bank Deposits Are Shrinking Rapidly in New York.

NEW YORK, Aug. 21.—Considerable uneasiness prevails Wall street today on account of reported distress among merchants and urgent need of finance. An estimated reduction of \$3,000,000 to \$5,000,000 in tomorrow's reserve in the bank statement, a corresponding heavy shrinkage of deposits, and the encouraged expectation of the early issue of clearing house certificates by the banks. A careful canvass of the leading bank officials elicited a unanimous expression of the opinion that there was no need for the issue of certificates at the present, and such can only be made in case of an extreme necessity.

Prices reported today for choice grades of mercantile paper, 8 per cent. Time money is an unknown quantity at 6 per cent and commissions.

A CARD FROM MR. POGUE.

He Was Not Employed by Anyone to Report Speeches.

SALEM, Aug. 21, 1896. EDITOR JOURNAL:—I have noticed several editorials in your paper in which you allude to me as having been employed by Hon. Tilton Ford to report a speech which he made before the Workingmen's Republican club in this city a short time ago, and also as having been employed by the Statesman to report Hon. H. L. Barkley's speech which he made at Silverton a few days since, and I write to correct the error.

I am conducting a stenographic office on my own account in this city and I was not employed by Mr. Ford or the Statesman to report either of these speeches.

I have made it a practice to take any speeches I desired to take whether or not I was employed to do so, where the speakers were not averse to being reported, during the present campaign, and I reported those speeches the same as I reported that of General Weaver and others, and the notes are my personal property and if yourself or any person desires to obtain a copy for publication or otherwise and will pay me for reporting and transcribing the same they will be furnished.

I report campaign speeches and take chances of selling them and have made some money in that way and propose to continue this practice throughout the campaign. Some have been sold for publication and others for private use.

You will kindly publish this in your paper and set me right before the public.

Yours truly,

M. E. POGUE.

TO COOS COUNTY.—Governor Lord has left his Seal Rocks summer resort and proceeded by steamer to Coos county, where he will look into the tie election on member of the legislature. The constitution says the governor shall call the special election, but there is a statute against it. The governor did not like to set aside the statute, which is clearly in derogation of the constitution, and suggested that a case be brought in the circuit court. As the legislature is close on the senatorship a new election is of great interest to the people.

THE MONEY CLIQUES

Confounded by the Political Situation.

NOTED PHILADELPHIA BANKER

Reviews the Situation on the Money Question.

It is but a little more than three weeks since the gold contractionists, frightened by the rapid depletion of the treasury gold reserve, the early prospect of another bond issue, and the inevitable effect that such issue of bonds with which to bolster up our tottering gold standard must have had upon voters, took steps to replenish the gold reserve and place a check on the deportation of gold and consequent drain on the gold reserve. To distract the masses of the American people from the consideration of the inequities of the gold standard has been, to the gold contractionists, a prime necessity and another bond issue would have done much to focus the attention of voters on a monetary system that has proven so faulty and unstable that it has only been kept from collapse during the past three years by bond issue after bond issue and the saddling of interest charge after interest charge on our people.

That such focusing of the attention of American voters on our money system must upset the fond hopes of the gold contractionists who hope to still further profit from a continuance of the suffering of our producing classes that is inseparable from the appreciating gold standard and a continued fall in prices consequent thereon, was and is quite evident and to none more so than the gold contractionists. So, when towards the last of July another bond issue was threatened they strove to avert it. The New York banks, followed by those of Philadelphia, Boston and Chicago, surrendered to the government in exchange for greenbacks, sufficient of their holdings of gold to raise the treasury gold reserve to a sum considerably in excess of \$100,000,000. But after having thus replenished the gold reserve to an amount in excess of the sum of \$100,000,000, fixed upon the gold contractionists and without authority of law as the minimum below which the government cannot permit the amount of gold held for the redemption of government paper, of greenbacks and treasury notes, to fall with safety, the question was how to keep it intact. The drain on the treasury for gold has been largely due to the demand for gold for export and the greenbacks and treasury notes presented at the New York sub-treasury for redemption in gold had been largely presented by those bankers dealing in exchange and who had need of gold for export to cover the drafts they had drawn on London and to meet the demands of remitters. To avert the shipment of gold was the first step that had to be taken to check the drain on the gold reserve. And this step the exchange bankers, under the leadership of Mr. Morgan, at once prepared to take.

But the demand for the export of gold was urgent. For the year ending June 30, 1896, as for years previously, our exports had fallen far short of providing the means for the payment of our current indebtedness in full. True, our exports had been largely in
